[I enclose the new metric coin scale,
that I am very anxious to get collectors
to adopt, for your examination...]

15 Wavenly Place
New York City
Dec 23 1878

Messrs H. & H. Chapman,

Dear Sirs,

I enclose the new metric coin scale, that I am very anxious to get Collectors to adopt, for your examination I also mail to you a metric chart which will explain itself. A number of dealers & collectors have already adopted it & I hope you will also see its advantage over the arbitrary scales now in use. The metric system within a few years will be our only system & then we will be in conformity with the rest of the world in a decimal system of weights & measures, like our money. This scale is in millimetres which are constructed on Jones scientific principles; it is a decimal scale, one

an International one, and therefore much better for Collectors than either of our old scales. Besides, the Numbers of the ~~millimeters~~ sizes of the coins corresponds to the Numbers of the millimeters on the scale, so that the size of a coin is the Number of millimeters in its diameter.

Again, all countries using the Metric System measure the diameter of their coins in millimeters, so that by our adopting this scale, we use the same that all these countries use in their mints.

This is a great advantage over the arbitrary scales of Ounces & the 16 inch scale. The 1/16 inch scale is as bad as Ounces as its unit is entirely arbitrary. It is next divided decimally & when the size of a coin is given, it has to be divided by 16 in order to find its diameter.

I hope you will see the advantage of this scale. Should you adopt it or be willing to print it in your catalogues, I will send you an electrotype of it.

Yours truly

Wm. B. Westwood

The Metric Scale for Measuring Coins.

(*Millimeters.*)

Scale of sixteenths of an inch reduced to metric scale (approx.).

(Sixteenths.)	(Metric.)	(Sixteenths.)	(Metric.)	(Sixteenths.)	(Metric.)
Size 1 =	Size 2	Size 23 =	Size 37	Size 11 =	Size 70
" 2 =	" 3	" 24 =	" 38	" 45 =	" 71
" 3 =	" 5	" 25 =	" 40	" 46 =	" 73
" 1 =	" 6	" 26 =	" 41	" 47 =	" 75
" 5 =	" 8	" 27 =	" 43	" 48 =	" 76
" 6 =	" 10	" 28 =	" 44	" 49 =	" 78
" 7 =	" 11	" 29 =	" 46	" 50 =	" 79
" 8 =	" 13	" 30 =	" 48	" 51 =	" 81
" 9 =	" 14	" 31 =	" 49	" 52 =	" 83
" 10 =	" 16	" 32 =	" 51	" 53 =	" 84
" 11 =	" 17	" 33 =	" 52	" 54 =	" 86
" 12 =	" 19	" 34 =	" 54	" 55 =	" 87
" 13 =	" 21	" 35 =	" 56	" 56 =	" 89
" 14 =	" 22	" 36 =	" 57	" 57 =	" 90
" 15 =	" 24	" 37 =	" 59	" 58 =	" 92
" 16 =	" 25	" 38 =	" 60	" 59 =	" 94
" 17 =	" 27	" 39 =	" 62	" 60 =	" 95
" 18 =	" 29	" 40 =	" 63	" 61 =	" 97
" 19 =	" 30	" 41 =	" 65	" 62 =	" 98
" 20 =	" 32	" 42 =	" 67	" 63 =	" 100
" 21 =	" 33	" 43 =	" 68	" 64 =	" 102
" 22 =	" 35				

This scale is in millimeters (the $\frac{1}{1000}$ part of a meter, which is the International Unit of length). It is not only a decimal scale, but it gives us an international scale, as all countries using this system measure the diameters of their coins by it.

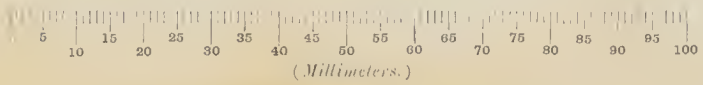
The scale of sixteenths of an inch has been reduced to the metric to enable collectors, having their collections sized by the old system, to make the change without trouble.

The scale was first reduced to hundredths of a millimeter, and then approximated by throwing out fractions below $\frac{1}{2}$ and increasing those above to the next unit.

W. B. WETMORE.

New York, April, 1878.

The Metric Scale for Measuring Coins.



Scale of Mionnet reduced to metric scale (approx.).

(Mionnet.)	(Metric.)	(Mionnet.)	(Metric.)	(Mionnet.)	(Metric.
Size 1 =	Size 8	Size 8 =	Size 44	Size 15 =	Size 64
" 2 =	" 14	" 9 =	" 17	" 16 =	" 67
" 3 =	" 21	" 10 =	" 49	" 17 =	" 70
" 4 =	" 25	" 11 =	" 54	" 18 =	" 73
" 5 =	" 29	" 12 =	" 56	" 19 =	" 76
" 6 =	" 33	" 13 =	" 59	" 20 =	" 85
" 7 =	" 12	" 14 =	" 62		

This scale is in millimeters (the $\frac{1}{1000}$ part of a meter, which is the International Unit of length). It is not only a decimal scale, but it gives us an international scale, as all countries using this system measure the diameters of their coins by it.

The scale of mionnet has been reduced to the metric to enable collectors, having their collections sized by the old system, to make the change without trouble.

W. B. WETMORE.

New York, April, 1878.

Compliments
W. Wetmore

1 inch	equals	0.0254	meter,	or about	$2\frac{1}{2}$ centimeters.
1 foot	"	0.3048	"	"	30 "
1 **YARD**	"	0.9144	"	"	$\frac{10}{11}$ OF A **METER.**
1 mile	"	1609.	"	"	$1\frac{6}{10}$ kilometers.

1 long ton (2240 pounds)	"	1016.05	"	"	1 metric ton.

Later in the same report, with words prophetic of what we are evidently soon to see, Mr. Adams says: "If man upon earth be an improvable being; if that universal peace which was the object of a Saviour's mission, which is the desire of the philosopher, the longing of the philanthropist, the trembling hope of the Christian, is a blessing to which the futurity of mortal man has a claim of more than mortal promise; if the spirit of evil is, before the final consummation of things, to be cast down from his dominion over men, and bound in the chains of a thousand years, — the foretaste here of man's eternal felicity, — then this system of common instruments to accomplish all the changes of social and friendly commerce will furnish the links of sympathy between the inhabitants of the most distant regions; *the meter will surround the world in use as well as in multiplied extension;* and one language of weights and measures will be spoken from the equator to the poles."

Nearly every other nation of Europe having led the way Russia is about adopting the Metric weights and measures. The special committee which is sitting at St. Petersburg, at the head-quarters of the Russian Imperial Technical Society, have not only come to the conclusion that such an innovation would be useful, but have also emphatically declared that the present is the fitting moment for the introduction of the Metric System. They think that the change ought to be accomplished within two years. It is a remarkable fact that Americans, with all their boasted readiness to adopt labor-saving inventions, and having led the world in use of a decimal currency, should be one of the very last nations of the globe to adopt what John Quincy Adams, in his official report, pronounces the greatest invention of human ingenuity since that of printing, and a greater labor-save than steam.

[The letter and bid sheet are most likely of the same date. The letter refers to the bid sheet, despite the bid sheet having a "June 3" date. This may be a mistake.]

[Letter is very fragile.]

Allenhurst N.J.
July 3 – 04

S. H. & H. Chapman
1348 Pine St. Philadelphia.

Dear Sirs –
I send you two sheets filled out with
for the auction sale coming off on July 7th & 8th
I am bidding for the Gobrecht field, not that
I really want it for there is really no difference between
[illegible] & the other except position of the word, but it
seems to be necessary to make a collection complete &
[illegible] get the '38, '52 & '58 – My collection is complete
[illegible] every date, except the last few years which I
[illegible] get from you – I think varieties are carried
[illegible] to extreme. When one of the old eagles has
[illegible] the reverse a large heraldic eagle with a shield
[illegible] the other an ordinary spread eagle the variety
is so marked it really makes a different piece.
Likewise eagles 4 stars facing or 6 stars or dimes
of 97, 13, 15 & 16 stars, but when it comes to two
pieces exactly similar except five berries on the leaf
[illegible] one & six on another, it seems absurd to pay
[illegible] large price for the other variety. Of the 1795
dollars Randall made a specialty – He bought
every one he could & had 22 varieties. named
Randall No 1 – No. 2 &c. [illegible] [illegible] he had many
duplicates & of those remaining I got from him
7 varieties – [illegible] his collection is [illegible] [illegible]
[illegible] [illegible] the largest [illegible] – Now [illegible] [illegible] [illegible]

here & hereis
there & stars near & stars off — should these labels
get lost even from the minute descriptions I have
I believe it would take me a week to relabel
them. In fact when you see a piece you
cannot tell whether the one you see is say star
near the bust or star off the bust unless you
also see the other variety to compare whether it
is nearer or farther than the other
& I have given my reds considerably higher than
I expect the pieces will bring so as to give
you plenty of latitude.

You sent me a letter after I saw you in
Philadelphia, giving me the prices for proof
sets of silver from 1882 to 1904 inclusive.
I added it up & think it came to some $80-
I was going to send for them but found in drawing
the check that my bank account was too low & now I
have lost the letter. I have hunted everywhere &
cannot find it. If this is about the price
of the sets I will take them & wish with
them you would give me another list of the
price for each date. Since '82 I have not
been getting my proof sets, nor collecting much
except a few foreign pieces when abroad. &
I now want to make my silver complete to
date. How I missed the '65 gold set I
never knew. Never discovered it till long after
I suppose it was because gold was at such
a very high premium. It was running then
to nearly 300. I see I gave or rather Ivy
Hatton for me, $101.25 in currency for
the gold & silver proofs of 1864. In currency

[illegible] to '65 is worth a fortune now
[illegible] is calculated on the currency basis of '65
[illegible] currency basis of to-day or your work

[illegible] want a priced catalogue of this sale -
[illegible] am going away the middle of the week to
[illegible] visit some friends at Narragansett Pier & then
[illegible] start in to inspect some automobiles & shall
[illegible] gone a week - & wish you would keep them
[illegible] pieces for me until I write on my return -
[illegible] I mail you an article I wrote for the local
[illegible] paper here by request which may interest you
[illegible] patriotic season of the year - I also
[illegible] you find & post both of you gentlemen
[illegible] ten as members - Everybody around here belongs
[illegible] to it. The Mayor & Gov. Pothier are on the
Executive Committee.

Yours very truly
Wm. Vernon Westcott

If you drop me a line say on Saturday or Sunday
letting me know when I will see you
[illegible] when I return

Allenhurst – N. J.
Dec. 14. '04

Messrs. H. H. & H. Chapman
1345. Pine St. Philadelphia.

My Dear Sirs.

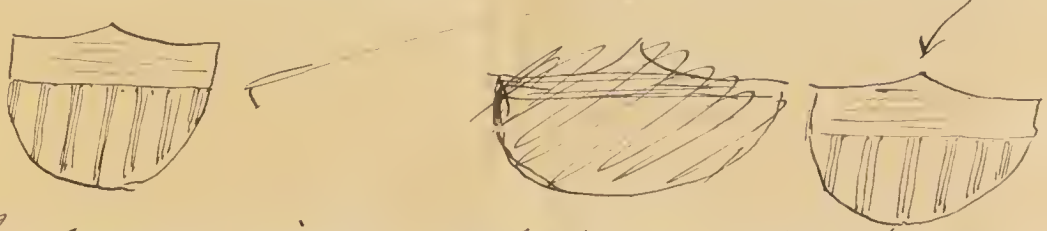
I beg to thank you for the 1884 3 cent nickel you sent me which was left out in the set. When I opened the set & laid them in a drawer I noticed this piece was not with the others, but thought that the issue had ceased & did not discover it for several days afterward when I had catalogued them & put them with the others in their own drawer. Was going to write you when your piece came – I find that I have only the 1904 Philippine set. Did not know of 1903 until you spoke about it the other day. If the proofs of 03 are as cheap as the 04. I would rather get a set than bid for Lot 617. If you have more set this 617

Stand. The Bryan dollar was made by the Gorham Mfg Co in New York (I think No 342 - is the same piece) I got two at the time. Both they were sent with the Collection I seem to have got lost in moving. I enclose a few bits.

In looking at the U.S. Shield on the Philippine issue I see it is very like all the rest of the shields of American gold & silver of all denominations, the only exceptions I find so far, as I looked through the other day, being the Eagles of 1797, and 1798. ie. 7 red & 6 white Stripes. The following year 1799. the Shield was changed to 7 white & 6 red & has continued so ever since & all other denominations have done so also. None ever having as I can see the Shield of the Eagle of 1798.

Shields & Heraldry are very old, & have their own peculiar signs & meanings & when a new one is invented for a new Country, its Coat of Arms should be modeled on the rules existing for centuries. The U.S. Designers as we all know has 7 red & 6 white

Stripes. The outside one of Cornua being red. The Shield of Cornua is the same only with perpendicular Stripes, 7 red & 6 white. Outside one of Cornua red. In Heraldry, a (in engraving) a plain Surface signifies white, horizontal lines blue, perpendicular lines red, diagonal from upper left hand Corner of Shield to lower right hand corner, green. & from right to left diagonal - purple. Le Le. The shading on the Shield should for red Therefore have 7 shaded outside Stripes, & 6 plain for white. To be Correct. thus, not



I suppose without thinking or knowing, the shading was used for to represent Stripes & not Colors, to distinguish them & make 13. But the shading is for red. as the horizontal (Correct) is for blue. The only reason I can see for this first change is that it makes the Stripes plainer. When the red shaded stripe is on the outer edge

of the Shield the outer line marking the shield is not so distinct as you will see by referring to some of the smaller pieces. Thus

the line of shield in the first place runs into the Sleeping, while it does not if it is separated by an open space. Still this is all wrong & I cannot imagine how it has come on so for so many years.

I write for the mail, lest the bill get in late—

Yours very truly

Wm Boerum Wetmore

Have you a price list of the medals issued by the Mint or do they have them on application. I mean for the Presidential or Peace medals & the naval battles.

A long description was in the New York Herald of Sun. Dec. 4th

W.

What were the dates of those eleven Eagle pennys you showed me the other day—

14th mo 12 1904

Messrs S. K. & K. Chapman,

Dec: 15th 04
1.30. P.M.

Messrs S.H. & H. Chapman.
1348. Chestnut St. Philadelphia.

My dear Sirs -

Your 14th recd this morning. This will go out at 3.30 so will need a quick delivery to be recd tonight. I will bid $5.00 on the 1/2 Dimes. Mills only brought 4.00. Lot 345. I make the bid in case it should go that high.

Lots: 447, 450, & 618 I will raise each to $2.00. As you say you have 1903 Philippine set in proof for $3.00 I will take it & you can strike out bid for lot 617:

I do not know what the 1/2 Dollars in Proof of 1877, are to which you refer. What I asked about was what were the dates of the Eagles you showed me. Were they Clean Proofs.

About the Shields on Ret. Coins I would prefer that my letter be not shown as that one was considered [illegible]

hurry & I owed Joyce to write another
on that subject alone & in a little
better language. When I saw in a
paper a picture of the new piano
I dictated a letter to a typist under
with some others she was writing to
the Secretary of the Mint, calling his
attention to this point about the
Shield. The letter was not as
clear as it might have been owing
to several errors & I can't see by to
be accepted & forgot it until too late
to send for this issue. In closing you
Lately this subject came up & I will
write another letter, that is plainer.

Yours very truly

Wm. Boerum Metcalf
